Soft skills: Technical leadership, Mentoring dev teams, Scrum mastering

EMPLOYMENT

Agile Team Lead Jul 2023 – Jun 2025

Andersen Lab, Kazakhstan, Astana

Project: equity compensation management system

Accomplishments:

- Technical leading and scrum mastering a team of 4 devs including myself.
- Delivered complex and key product to customer about managing the money flow in the company.
- Completed and integrated the system for work with all worldwide bank requisites, based on the data by SWIFT
- Invented a new approach for integration blackbox testing of components, that allowed to fix ~10% of
 incorrect written tests; to reduce dependence on environment; and to decouple tests from codebase
 implementation.
- Invented a new set of declarative API, that allowed to reduce the codebase size on ~20%.
- Built my team of frontend developers and started a new product as a technical lead from scratch with clean architecture, taking into account previous experience of the project.
- Interviewed around ~30 people with further hiring of 8 senior devs.

Senior Frontend Engineer

Andersen Lab, Kazakhstan, Astana

Project: equity compensation management system

Accomplishments:

- Decreased recompile time from 20-40 secs to 3-5 secs by adding development mode configuration.
- Decreased time of implementing pages with table components (~90% of all functionality) from 2-3 days to 1-2 hours by code base refactoring.
- Incorporated several parts of the reporting product for admins.
- Fixed 10.000 errors and unified style guide by incorporation eslint.
- Fused 100+ hours of developers from downtime while working without stable environments.
- Improved performance of table components from 10-20fps to 60fps by code base refactoring.

Full Stack Engineer Nov 2023 - May 2025

Kazakhstan, Astana

Accomplishments:

- Designed bonus expiration functionality of loyalty program.
- Designed architecture for mass operations system.
- Refactored a couple of legacy modules.

Senior Frontend Engineer

Sep 2022 - Oct 2023

Trade Moon, Russia, Moscow

Project: online trading platform.

Accomplishments:

- Increased UI performance, from useless 5-7 rerenders in a second of the entire app to rerendering of only 1 chart with ticks.
- Powered our own UI library, with reusable components.
- Added cypress for testing. Upped tests coverage from 0 to 30%.
- Setup and mentored "devs" to work in Gitlab instead of messaging code changes in rar archives.
- Created admin panel from scratch.
- Migrated from CRACO to Vite.
- Interviewed/hired and have been managing 5 junior devs

Senior Frontend Engineer

Sep 2021 - Jan 2022

Project: online education platform of English language with video lessons.

Accomplishment:
